EXECUTIVE SUMMARY

Skilled PHP Developer with over 3 years of experience in designing, developing, and optimizing high-performance web applications. Proficient in Laravel, OpenCart, and Core PHP development, with expertise in backend architecture, API integrations, and database management. Adept at building scalable and secure systems that enhance business operations and deliver seamless user experiences. Strong problem-solving skills with the ability to adapt quickly, handle multiple tasks efficiently, and optimize complex workflows. Committed to writing clean, maintainable code while ensuring performance, security, and reliability. A proactive team player who thrives in collaborative environments and continuously seeks to improve processes and solutions.

Education

BS **UET Peshawar, M.E** **Sept 2017 - May 2021**
 • GPA: 3.01/4.0

Experience

Sigma digital solution Islamabad, Backend developer **Sep 2021 - Present**
 Backed PHP Developer at Sigma Digital Solution, responsible for developing APIs for web and mobile applications, integrating advanced functionalities such as payment gateways (checkout.com, Stripe, Tap Payment, MPGS), and ensuring seamless, secure transactions. Engages in server-side logic, database optimization, and collaborates with front-end teams to deliver scalable, high-performance applications tailored to user needs

Projects

E-commerce Web Projects

Worked on e-commerce platforms to enable seamless online shopping experiences, focusing on product management, order processing, and payment integration. Ensured smooth user journeys and efficient backend solutions for scaling up online businesses.

Tools Used: PHP, OpenCart, JavaScript, CSS, Bootstrap, MySQL.

Present

Project: AL Aswad - E-commerce platform enabling seamless shopping experiences.

Subscription-based Web Platforms

Worked on subscription-based platforms, developing systems to offer exclusive content and services, focusing on payment gateways, content management, and user engagement features.

Present

Tools Used: PHP, OpenCart, JavaScript, CSS, Bootstrap, MySQL.

Projects: Method By Kat - Subscription-based platform for exclusive content and services.

Business Solution Web Platforms

Past

Worked on advanced business solutions, focusing on data management, reporting, and analytics to help businesses make informed decisions. Ensured smooth integration with enterprise systems and user-friendly interfaces for managing large volumes of data.

Tools Used: PHP, OpenCart, JavaScript, CSS, Bootstrap, MySQL.

Projects: Datacom - Business solution platform offering advanced data management.

Real Estate Web Projects

Past

Worked on real estate web applications tailored for builders to manage land purchasing processes, including booking and monthly installment tracking, through to final plot handover. Focused on creating backend solutions that streamline administrative tasks and enhance transaction visibility for real estate developers.

Tools Used: PHP, Custom PHP MVC Framework, CSS, Bootstrap, Ajax, JS.

Projects: Winter Valley - Real estate platform showcasing prime property listings.

Cinema Booking Web Platforms

Present

Developed cinema booking systems, focusing on user-friendly interfaces, ticket booking, payment integration, and personalized user experiences. Enabled cinema operators to manage schedules and customer interactions efficiently.

Tools Used: PHP, Custom PHP MVC Framework, JavaScript, CSS, Bootstrap, MySQL.

Projects: Noir Cinema - Cinema booking system with user-friendly interfaces and advanced features.

Healthcare (HMS) Web Platforms

Present

Worked on healthcare platforms to deliver telemedicine services, patient management systems, and appointment scheduling features. Focused on secure, user-friendly interfaces and data privacy for both patients and healthcare providers.

Tools Used: PHP, Custom PHP MVC Framework, JavaScript, CSS, Bootstrap, MySQL.

Projects: Neo Health - Healthcare platform delivering telemedicine and patient management solutions.

REPs UAE Web Projects
